

Iris Recognition Public Safety & Justice Growing User Base

Since 2020, the FBI's Iris Service user base has grown significantly. More than 22 OBIM partner agencies share iris data with the Immigration repository. Most of these systems use iris cameras provided by Iris ID. Iris is being added to Civil ID (CHRC) Background check process.

Dept. of Justice 3m iris records

Stores biometrics from

- Domestic arrests
- International arrests
- Latent crime scene prints

Dept. of Defense 15m iris records

Stores biometrics from

- Detainees
- Enemy combatants
- Latent prints from IEDs

Dept. Homeland Security 10m iris records

Stores biometrics from

- Visa Applicants
- Travelers to U.S.
- Immigration violators

Q. What is in the FBI Iris repository?

A. Approximately 3 million identities and growing at a rate of 100k/month.

Q. What other agencies use iris repositories?

A. The Department of Defense and Immigration Database supports Iris.

“Iris technology is quick, accurate and provides significant efficiencies for the criminal justice and national security communities.”

JOHN DERBAS,

Deputy Assistant Director of the FBI's Criminal Justice Information Services Division

Where does Iris Enrollment & Matching Happen?

Iris enrollment happens primarily at the local level. Identification matching is at Local, Regional, State, and National level. Once at the National level matching in DHS OBIM and DOD may occur.

Iris Use Cases

- Rapid Non-contact ID
- Intake & Release
- Transportation
- Work Release
- Parole Check-In
- Immigration Database Search
- National Database Search
- Investigation Search

Q. Why should my agency use an iris recognition camera?

A. Iris technology provides highly accurate non-contact positive identification of individuals.

Jason Thompson

Assistant Chief, U.S. Border Patrol

"Adding the iris modality allows us to create a biometric record on subjects whose fingerprints are less than ideal or just won't work at all."

Discover the efficiency of NextgenID's PRESENCE Station, integrated, with Iris ID iBar600 for Supervised Remote Identity Proofing (SRIP), ensuring precise identity proofing and verification across IAL levels 1-3 with ease and accuracy.
